

Introducing Ziptrak® Interior

A revolutionary advance for interior blinds

www.ziptrak.com.au

Ziptrak® Interior blinds provide superior insulation and sun protection. Designed to enhance your indoor comfort and style.

**NO CORDS
OR CHAINS –
CHILD-SAFE.**

Ziptrak Pty Ltd is pleased to present a brand-new approach to interior window furnishings. Developed and refined over several years, Ziptrak® Interior is a track-guided system that moves at the touch of a finger, without cords or chains.

Our revolutionary blind system will change what you expect from a blind. With one effortless glide, you can control light, airflow and insects. No more flimsy cords or hot air leaking from around the sides of the blind.

Just like our trusted and patented outdoor blind system, Ziptrak® Interior allows you to easily lower or raise the blind in seconds. Proudly Australian designed, made and owned.

Superior insulation.

Leave at any height.

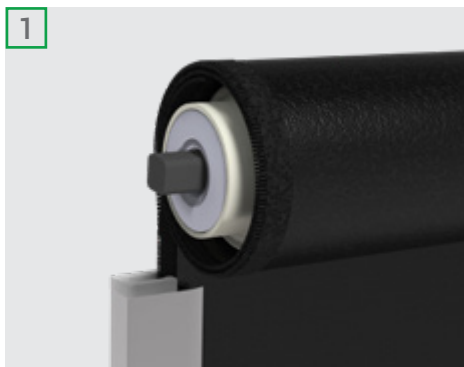

Fingertip control.

Total blackout.

Robust and durable.

Open weave fabric allows you to enjoy the view as well.

SMOOTH OPERATION

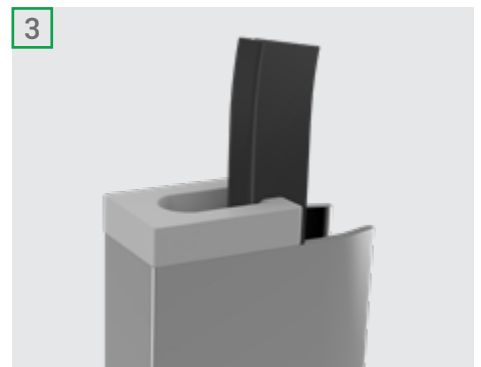

Ziptrak® Interior operates without cords or chains which makes it child-safe and easy and intuitive to use. With Australian engineered springs, the blind smoothly glides up and down, and will stay at any position.

Optional motorisation is available for one-touch convenience.

STYLISH PELMET

The aluminium pelmet offers stylish and robust protection to the blind, along with superior insulation and light blocking capabilities. The slim and discreet system is worthy of its presence within your home.

TRACK-GUIDED

Our innovative Ziptrak® Spline secures the fabric in its small side tracks. This provides total light blackout with particular fabric selections, and ensures no flapping when left down over an open window. By creating a sealed space between the glass and blind, the system minimises air transfer between inside and out, keeping your space cooler in summer and warmer in winter.

SUN AND UV PROTECTION

EXCEPTIONAL LIGHT BLOCKOUT

MANUAL OR ELECTRIC OPERATION

SMOOTH TRACK-GUIDED OPERATION

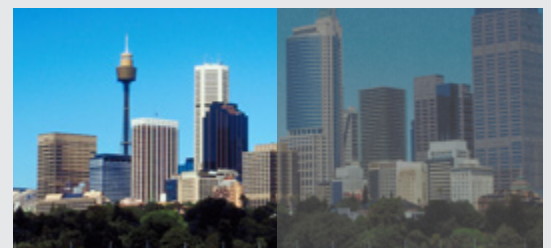

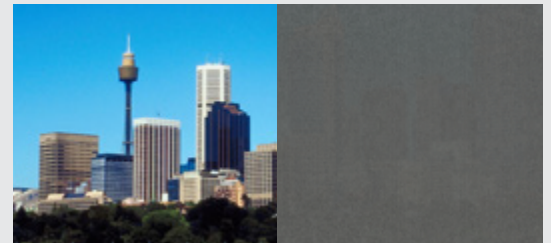

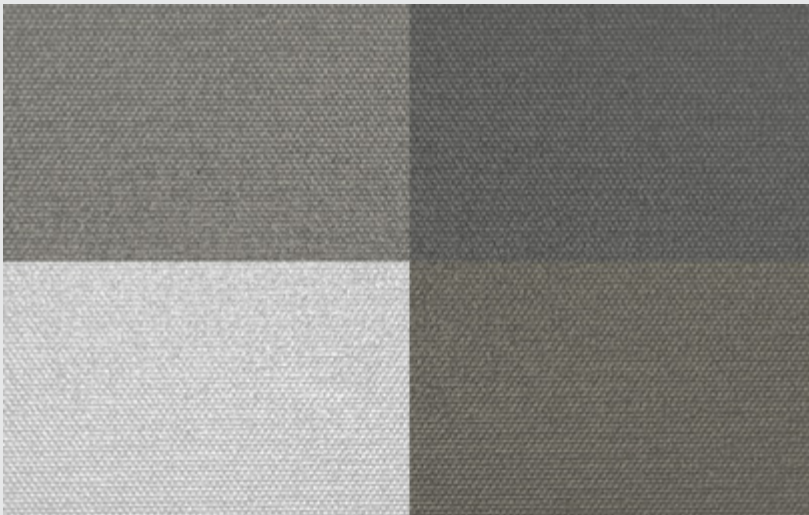

Ziptrak® Interior blinds are available in a range of superior fabrics providing the ultimate insulation and sun protection.
